

## Gateway Technology Overview

### **Student Accounts:**

All Gateway students are provided with 4 user accounts, including: *Google Apps* (email, calendar, docs, sites, etc), *PowerSchool* (grades & attendance), *Student Server* (file storage and web publishing), and *VolunteerMatch* (community service opportunities).

### **What's my Username & Password?**

Students & guardians may request their username and password from their Gateway Advisor. Usernames formulated as such: Last 2 digits of expected year of High School graduation plus entire first name plus first initial of last name. So, if Tim Lincecum were a Gateway High student graduating in 2015, his username would be: 15timl.

### **School Provided Email Accounts:**

Access has changed for High School students in order to accommodate the addition of the Middle School domain. All Gateway students may now access their school-provided *gatewayhigh.net* or *gatewaymiddle.net* email account at <https://gmail.com>. When you login at Gmail, make sure that you type your entire email address in the username field. So, if your High School provided username is *15kevinm*, your login username for Gmail is *15kevinm@gatewayhigh.net*.

### **PowerSchool:**

You may access the Student/Guardian PowerSchool portal at <https://gateway.powerschool.com>. Students and guardians share the same login credentials.

### **Student Server:**

Students with Macintosh computers may access their Student Server network account from home at the following AFP address with the *Connect to Server...* function available from the *Finder's* "Go" menu, "students.gatewayhigh.org"

### **VolunteerMatch:**

You may access Gateway's VolunteerMatch portal at this address: <http://gateway.volunteermatch.org>. See your Gateway Advisor for more information.
